Newspapers Monitoring Report at a glance

Journalists have been running their professional life within lots of limitations. Firstly, journalists are not able to move as per professional needs because a good number of journalists are being infected by coronavirus. Most of them are in isolation and performing their professional duties from home. Need based Information collection is a big challenge. They are mostly depended on official updates and versions. Expert's opinion is another way to gather information and interpretation. But checking field reality isn't possible as per requirements. Telephone and Internet both are helping journalists to do their works. Here official sources aren't that much open to disclose reality, they are habituated with self censored information dissemination. So readers can raise their concerns about trust worthy journalism. Media houses are also facing another challenge which is related to shrinking their revenue from both sources: advertisements or sponsorships and circulation

Coverage analysis has helped to identify 62 coronavirus related issues with 168 sub issues and 3 other health issues with 6 sub issues. Study team was compelled to redesign list of issues covered by newspapers. There are 63 broad issues related to corona virus with 165 sub issues and 3 issues other than corona virus with 6 sub issues. Due to frequency of reports, here a health service has been divided into two: Health services in general and Health service in private hospitals. Because services of private hospitals on COVID and non-COVID were discussed in newspapers denial of health services is not a new issue for newspaper but services and treatment cost in COVID sections got new dimension In this section fire in an isolation centre of a hospital included in this section. Garments Industry has been included a board issue here. Chattogram has qualified as a broad issue because we found that it became another infection hot spot after Dhaka and Narayanganj

During this month, newspaper published reports on life after reopening where violations of health safety codes of conducts were visible. They also projected dangers related to those violations with photos. Similarly, newspapers have been publishing different articles on policy and social guidelines to make people safe and active economy. Reports are also available on social stigma and consequences of those stigmas.

Reopening: Different reports and articles were available on Reopening, these are Daily Star has publishes on Govt. health expert panel on Reopening risks, Prime Minister on reopening, Withdrawal of lockdown: how we should plan, DGHS Health Safety guidelines on reopening: Samakal has published on Lockdown 'exit plan' and New Business Platform; New Age has published on: Health Minister's prediction on Reopening of shops may increase COVID-19 cases and No health monitoring at markets; Prothom Alo start of normal life in the country may be delayed Transport Service after reopening and Bangla tribune Chances of infection increase after relaxation.

Identified key Issues presented in newspapers are: 1) Ensuring protection of professionals (health, law and enforcement agencies, field administration and media professionals), 2) Rejoining in work of corona warriors especially health professionals, 3) Infection risk associated with reopening, 4) Inhuman stories because of social stigma, 5) Need based health budget allocation, 6) Infections in the garments industry, 7) Pro people politicians' roles, 8) More testing, 9) Human rights during corona pandemics, 10) Inclusive move for fighting against corona virus, 11) Engage faith actors for the betterment of people during this pandemic, 12) Necessity of comprehensive plan for addressing better health care, 13) How to get rid of corona virus, 14) National action plan for overcoming pandemic crisis, 15) Strengthening universal health care, 16) Ensure treatment in private and government hospital both COVID and non-COVID patients, 17) People's oriented hospital service delivery and 18) Need necessary actions against fear and social stigma.

Introduction: Media Reality in Bangladesh

It is first time, Media in Bangladesh has enjoyed 6 days Eid holidays. But it is very unusual time for them. So media didn't get joy of reopening. They are facing both life and livelihood challenges. Journalist Group staged street demonstration on eid day for demanding their unpaid salaries and job retrenchment.

Journalists have been running their professional life within lots of limitations. Firstly, journalists are not able to move as per professional needs because a good number of journalists are being infected by coronavirus. Most of them are in isolation and performing their professional duties from home. Need based Information collection is a big challenge. They are mostly depended on official updates and versions. Expert's opinion is another way to gather information and interpretation. But checking field reality isn't possible as per requirements. Telephone and Internet both are helping journalists to do their works. Here official sources aren't that much open to disclose reality, they are habituated with self censored information dissemination. So readers can raise their concerns about trust worthy journalism.

Media houses are also facing another challenge which is related to shrinking their revenue from both sources: advertisements or sponsorships and circulation. At present, though business has reopened but media did not receive that business response from private sector. Side by side, due to full government concentration on coronavirus pandemic other development works are not taken into consideration. So very thin presence of government advertisements are in newspapers. In a nutshell, they are in financial crisis. Considering that background, each media house has been implementing their affordable plan by curtailing pages which has created limited scopes for news coverage in terms of number and length.

Newspapers Monitoring

As part of our assignment of Bangladesh Health Watch, we have monitored six newspapers; these are *Prothom Alo, Kalerkantho, Samkal, Daily Star, New Age and Bangla Tribune*. Prothom Alo, Kalerkantho, Samkal are national bangla daily newspapers, *Daily Star, New Age* are national daily newspapers, all five have print and online versions. There three versions in their online versions, i) real time updates ii) online daily newspaper and iii) e-newspaper- a newspaper as published one. Along with their bangla online version, *Prothom Alo, Kalerkantho, Samkal* have english online version also. English daily *Daily Star* has bangla version also. *Bangla Tribune* is an online newspaper, which has two presentations- real time updates and daily newspaper. Credibility and readerships of newspapers are major concerns in selection of newspapers for monitoring.

Methodology

• We have read each report, feature, editorial, post editorial and article, interview and expert's opinion related to health issues published during this month in stated newspapers, and have compiled selected write-ups on a daily basis. Each news organization is active to update their portal in real time basis. So we monitor those also but our focus was daily publication only for this study.

- We have indentified core issue/s or message/s of each published item and have developed issue based storage and simultaneously we have developed a list of issues for each newspaper. Later we have developed a list of sub-issues under each issue related to health. Now issue along with sub-issue based compilation of the 6 newspapers are available here.
- Later we have developed a presentation of overall newspaper coverage scenario for May 2020 on the basis of selected items which has representative value of that category. Links of published items are available here so anyone can get detail of that published item as ready reference during reading this report. So it is now a monitoring report for disclosing issues for further work side by side a comprehensive publication for all.
- Except Bangla Tribune, this monitoring activity was mostly focused on printed versions but we have also included major development of any issues from online version of respective newspaper also. We have used issues covered for developing coverage scenario of newspapers.

Findings

Newspaper Coverage Scenario of Health Issues

Coverage analysis has helped to identify 62 coronavirus related issues with 168 sub issues and 3 other health issues with 6 sub issues. Study team was compelled to redesign list of issues covered by newspapers. There are 63 broad issues related to corona virus with 165 sub issues and 3 issues other than corona virus with 6 sub issues. Due to frequency of reports, here a health service has been divided into two: Health services in general and Health service in private hospitals. Because services of private hospitals on COVID and non-COVID were discussed in newspapers denial of health services is not a new issue for newspaper but services and treatment cost in COVID sections got new dimension In this section fire in an isolation centre of a hospital included in this section. Garments Industry has been included a board issue here.

Chattogram has qualified as a broad issue because we found that it became another infection hot spot after Dhaka and Narayanganj. There were numbers of issues related to coronavirus were available in Chattrogram such as shortage of health facilities increasing infected persons, increasing death and death due to treatment denial etc.

News on Dengue and diarrhoea were available during the monitored period. End of this month, a tragic fire accident took five lives in a private hospital; United Hospital was run isolation unit with fire safety measures.

A list of issues are identified which were frequently covered during this period. These are corona survivor's story, infected law enforcement agency, treatment denial both government and private hospitals, crowd of test seekers, updates of Chattogram, issues related to reopening (health safety issues like physical distancing and mask use etc.), testing facilities, sample

collection booths, telemedicine, health budget, corona virus related drugs by Bangladesh pharmaceuticals, testing kits of Gonoshasthyo, safety of prisons, medical waste and safety of waste cleaner, genome sequencing and majority of infected recovering at home.

A sequential presentation of reports on *Gonoshasthya* kit as below, all six newspapers have given similar coverage on this kit:

Gonoshasthaya Rapid Test Kit

Date	Headline and brief Content	Link

➤ List of issues related to Coronavirus

1. Heath Update

a) New Coordination

Annex: 1 (a)

IEDCR will no longer take corona samples

The Institute of Epidemiology, Disease Control and Research (IEDCR), will no longer collect samples. From now the work will be done by the Directorate of Health.

b) Infection Status Annex: 1(b)

A big leap in new cases

2,523 test positive in 24hrs as highest number of tests conducted

c) Whole country

Annex: 1(c)

Coronavirus has spread to all districts but one

d) Epidemiological surveillance

Annex: 1 (d)

Bangladesh is yet to conduct an epidemiological surveillance which is very important to understand the gravity of the coronavirus situation and will help take any policy decision in this regard.

e) Recovery rate

Annex: 1(e)

Nine out of 10 recovering i.e. recovery rate is 91.8 percent while the mortality rate is 8.2 percent

f) Second wave Annex: 1 (f)

Covid-19: Second wave if mistake repeated

The country may have to grapple with a second wave of coronavirus infections if the government fails to ensure strict institutional quarantine for 29,000 Bangladeshi workers set to return from the Middle East over the next couple of weeks.

g) No symptom patients

Annex: 1(g)

About 10 percent of infected patients do not have symptoms, Addition Director General of Health Directorate Professor Nasima Sultana said that about 600 identified patients are at home and in some hospitals, they have no symptoms.

2. Reopening

a) Reopening risks

Annex: 2(a)

People's movement to and from Dhaka continued, especially during the Eid rush and when export-oriented factories partially resumed operations last month, exposing more people to the risk of infection.

b) Prime Minister on reopening

Annex: 2(b)

Reaffirming her government's stance to be there with people until the coronavirus crisis is over, Prime Minister Sheikh Hasina said economic activities have to be resumed for the sake of the lives and livelihoods of people.

c) Lockdown 'exit plan'

Annex: 2 (c)

Our policy makers can take into account the experience of other countries then we can find sustainable, safe exit and recovery path in the shortest time.

d) Withdrawal of lockdown

Annex: 2(d)

Efforts have to be taken to ensure adequate physical distancing in workplaces, transports and homes, and face masks should be made mandatory when outside.

e) Guidelines on reopening

Annex: 2(e)

Health Safety: DGHS gives guidelines on reopening

The government has recently issued a set of guidelines on health safety measures that have to be strictly followed after the reopening of industries, businesses, educational institutions and services amid the coronavirus outbreak.

f) Chance more positive case

Annex: 2 (f)

Health minister Zahid Maleque said that the decision to reopen the shopping malls might lead to increase number of COVID-19 positive cases.

g) Absence of monitoring

Annex: 2 (g)

Authorities of markets are reluctant to put in place the necessary safety measures despite risks of social transmission in absence of government monitoring.

h) Transport Service

Annex: 2(h)

Trains and launches will start running from 31 May. And it has been decided to start road transport from 1 June.

i) New Business Platform

Annex: 2 (i)

This platform will mainly determine the impacts of coronavirus on the private sector and formulate strategies to overcome it. As well as recommending a strategy to recover the national economy.

j) Starting of normal life

Annex: 2 (j)

Corona infections have been increasing. Experts differ on how long the infection will last in the country. Directorate of Health is still suffering from indecision regarding treatment management in the hospital. In this situation, there is uncertainty as to when life will be normal.

3. Health Services

a) Dying at homes

Annex: 3 (a)

After the incidents of many patients dying with COVID-19 symptoms but untested, now confirmed novel coronavirus patients are dying also at home or being brought dead to hospitals in the country, officials confirmed.

b) Unattended Annex: 3 (b)

Most COVID-19 patients at home left unattended

The DGHS has no comprehensive data about how many COVID-19 patients are receiving treatment at home and how many of them have recovered.

c) COVID Certificate

Annex: 3 (c)

The hospital does not want to admit the patient without a certificate on coronvirus test.

d) Treatment in all hospitals

Annex: 3 (d)

When the government directed all the public and private hospitals with more than 50 beds to take measures for treating Covid-19 patients, some health experts said the initiative can spread transmission further.

e) No clinical audit

Annex: 3 (e)

As these cases were not examined in details, what experts call a "clinical audit", the real cause of death remains unidentified

f) Denial of emergency care

Annex: 3 (f)

i) Little care for the living and the dead

Emergency care is denied to many, resulting in fatal consequences.

ii) Emergency rooms cannot turn away patients

Emergency wards of hospitals turning away critically ill patients, no matter what symptoms they are displaying, is just not acceptable and violates all ethical codes that healthcare professionals and hospitals are bound by.

i) Hospital on wheels

Annex: 3 (i)

A hospital on wheels

The mobile hospital has brought huge relief for patients without Covid-19 symptoms in Cox's Bazar Sadar.

k) Deaths without treatment

Annex: 3(k)

64.78% of the deaths at home did not receive treatment, 12.62 % died on return from the hospital, 1.27 % were not treated due to corona panic, 3.90 % died on the road.

1) Medical Technologist crisis

Annex: 3 (j)

No appointment has been made for the post of Medical Technologist for 10 years.

m) Lack of preparedness

Annex: 3(m)

Public health experts, after the government's projection of possible new infections, said that the government was far from implementing its big promises.

n) Recovery at home

Annex: 3(n)

Recovery rate of corona patients is increasing, most of them are taking treatment at home.

o) Neglected microbiologists

Annex: 3(0)

Microbiologists are not being used properly in the health system of the country.

p) Sample collection centres

Annex: 3 (p)

List of centres is available here for sample testing

q) Self departure from hospital

Annex: 3 (q)

According to the DGHS, sixty patients have been discharged from the hospital in three days due to dissatisfaction, mistrust or discomfort.

4. Health Services in Private Sector

a) Fire in Corona Unit

Annex: 4(a)

Five people died in a fire that broke out at the Corona Isolation Unit of United Hospital in Dhaka this evening.

b) No fire safety

Annex: 4 (b)

Fatal Blaze at United Hospital: Burnt unit had no fire safety

c) Legal notice over death

Annex: 4(c

A Supreme Court lawyer sent a legal notice against United Hospital Limited asking for explanations alleging that the hospital's doctors and medical staff's professional misconduct, negligence and misbehaviour caused the death of a World Bank official's mother.

d) Traps of Private Hospitals

Annex: 4(d)

Some hospitals are taking opportunity to do business from the government by running COVID units. The government has already trapped several such private hospitals to cope with patient pressure.

e) Skyrocketing claims

Annex: 4(e)

Anwar Khan Modern Hospital authority sent a proposal to the hospital branch of the Health Directorate in the middle of last month expressing their desire to treat patients with corona. In the proposal, 18 26,07,315 taka was demanded every month as the operating cost of the 200-bed

hospital. The proposal of the hospital has been termed as illogical on by the concerned health officials

f) Corona treatment in private hospitals

Annex: 4(**f**)

There is no guidelines on whether the expenses will be borne by the government or the patient will bear the expenses himself. As a result, patients in every private hospital has to pay medical expenses from their own pockets. In that case, it will be difficult for the poor, lower middle class and middle class to get treatment.

g) Mobile Court Annex: 3(g)

A mobile court of the RAB on 13 May sentenced 10 hospital brokers to jail and fined one of them in a raid on a private hospital Mohammadpur, Dhaka. Abdul Razzak, the owner of Prime Orthopedic and General Hospital, was fined Tk 6 lakh for giving wrong treatment.

5. Safety of Health Professionals

a) Lost Two doctors

Annex: 5(a)

Two doctors died due to coronavirus, one was in Dhaka and another was in Narayanganj.

b) <u>Infected nurses</u>

Annex: 5(b)

Till 11 May, 360 nurses of government institutions were affected Similarly, about 200 nurses have been reported to be infected in private institutions.

c) **Healthcare workers protection**

Annex: 5(c)

Protecting our frontline healthcare workers should be the top priority

d) Status of infection

Anney: 6(d

Bangladesh Doctors Foundation, a forum of physicians, said that a total of 475 doctors were infected with the novel coronavirus while treating COVID-19 patients at both government and private hospitals.

6. Safety in Prisons

a) Risks in Prisons

Annex: 6(a)

Release of prisoners are going on in different phases for minimising risks of novel coronavirus transmission in overcrowded prisons.

b) Prevention measures

Annex: 6 (b)

Emergency response teams have been formed in each prison to deal with the Corona situation. Isolation has been introduced in each section. No prisoner is being sent to hospital from prison without the need for essential medical treatment. Meetings of relatives with the prisoners have been stopped. On the other hand, mobile phone booths have been introduced in all prisons

7. Safety of Law Enforcement Agency

a) Status of infection

Annex: 7(a)

Number of cases reaches 2,621

The numbers of Covid-19 infection in Bangladesh Police, Bangladesh Ansar and Village Defence Party are rising sharply on a daily basis. The total number of infections in the police force rose to 2,621 and 222 in Ansar.

b) Police station locked down

Annex: 7(b)

Police station locked down as cop tests Covid-19 positive

Kotwali Police Station in Rangpur city was put under lockdown after one of its officers tested positive for Covid-19.

c) Good treatment for police

Annex: 7(c)

Prime Minister Sheikh Hasina instructed the authorities to give priority to the treatment of police members.

d) Special team for taking care

Annex: 7 (d)

These special teams will visit the corona infected member physically and will inquire about their treatment. They will take immediate initiatives to solve problems of patients.

e) Reasons behind infection

Annex: 7(e)

According to Police Headquarter (PHQ) officials, overcrowded accommodation in police barracks and mismanagement of unit are to blame for the sorry state of the force.

f) Private Hospital for Police

Annex: 7(**f**)

Corona-infected police will be treated at Impulse Hospital in the capital. The hospital was initially rented for two and a half months. The 450-bed hospital will be used by the police to provide intensive care to corona-inffected police.

8. Safety of Media Professionals

Status of infection

Annex: 8

Another journalist died due to Corona. According to the Facebook page 'Our Media', which has been regularly publishing information about journalists being infected, 49 journalists have been infected in Dhaka and 11 outside Dhaka

9. Safety of Field Administration

Status of infection

Annex: 9

107 field administration officials, including DCs, ADCs, UNOs, AC land and Executive Magistrates, have infected during performing their duties such as ensuring social distance and home, burying the dead body and distributing relief.

10. Safety of Fire service members

Status of infection Annex: 10

24 officials of fire service and civil defense had been infected with COVID-19. Among them, one had recovered and the rest were kept in institutional quarantine.

11. Covid-19 symptoms

Death after Virus Symptoms

Annex: 11

A total of 929 people died in Bangladesh with Covid-19 symptoms between March 8 and May 12, according to a report of Centre for Genocide Studies of Dhaka University. Bangladesh Peace Observatory (BPO), a UNDP funded research facility housed at Centre for Genocide Studies. According to that study, 84 were held for 'spreading rumors' during same period

12. Test Facilities

a) Insufficient Test Facilities

Annex: 12(a)

43 COVID-19 labs not enough: Ministry

Health ministry additional secretary Habibur Rahman Khan on 20 May said that the existing 43 laboratories were not enough to conduct adequate number of tests.

b) Monthly test Target

Annex: 12(b)

Health Minister Zahid Maleque said there were plans to increase the coronavirus testing facility to 10,000 a day by this month. 15 new laboratories will be set up for testing.

c) Crowd of Test seekers

Annex: 12(c)

People with fever and other ailments started lining up from early morning, but only 200-250 people get the chance every day. The BSMMU authorities said they have nothing to do except saying sorry. They were planning to introduce online ticketing system.

d) Inadequate case detection

Annex: 12 (d)

As the number of Covid-19 deaths and infected patients keep going up, experts blame it on inadequate case detection and isolation measures taken up by the authorities.

e) Low Test rate

Annex: 12(e)

Experts however said the number of tests was still inadequate compared to the country's population and other coronavirus-hit countries.

f) Sample collection centres

Annex: 12(f)

Brac is going to set up 100 walk-in kiosks across 19 risky regions of the country, to expedite the government's initiative of scaling up testing capacity for the novel coronavirus.

g) Revision of protocol

Annex: 12(g)

Expert said. 'The new protocol will increase the risk of the coronavirus infection further spreading. This is a bad news for public health',

h) Sample collection booths

Annex: 12(h)

Dhaka Medical College Hospital (DMCH) received three sample collection booths (WISK Cabin) from PRAN-RFL Group for Covid-19 testing,

i) Sample collection booths by DNCC

Annex: 12 (i)

The Dhaka North City Corporation (DNCC) will set up booths at eight places.

j) More testing facilities

Annex: 12(i)

The government on 22 May permitted nine more private hospitals and diagnostic centres, along with the existing eight such facilities, to carry out COVID-19 tests.

k) **Invalid samples**

Annex: 12(k)

In Rajshahi, the rate of ineffective samples during coronavirus testing has been increasing.

13. Safety Equipments

a) Homemade KN95 mask

Annex:13 (a)

JMI Hospital Requisite Manufacturing Limited, a local medical equipment manufacturer, is preparing to manufacture KN 95 masks of the same quality in the country in line with Chinese guidelines.

b) Right masks

Annex: 13 (b)

Are these right masks?

Counterfeit and low-quality masks are also entering Bangladesh, creating potential health risks for those using it, especially healthcare professionals.

c) Isolation chamber

Annex: 13(c)

This isolation chamber for physicians is designed by an architectural firm called Bhitti Sthapatibrinda (architects) Limited. This chamber can provide protection to them.

d) Surgical Masks

Annex: 13 (d)

Minister Hi-Tech Park Limited, a Bangladeshi electronics manufacturer, is making 'Minister Safe Life Surgical Mask' in the country with more than 95% antibacterial resistance.

14. Media Reality

a) Stimulus package

Annex: 14(a)

Newspaper Owners' Association of Bangladesh (Noab) 31 April demanded a stimulus package from the government for newspapers, hawkers, workers and agents to offset the coronavirus impact.

b) Freedom of expression

Annex: 14 (b- i & ii)

Seven foreign ambassadors in Bangladesh on 7 May stressed the need for upholding independence of the press and freedom of expression for disseminating facts-based information during the current COVID-19 pandemic. Foreign Minister AK Abdul Momen described their remarks as "unfortunate, disappointing and unacceptable.

15. Corporate Responses

Annex: 15 (a,b,c,d,e,f,g,h)

Coca-Cola, Unilever, Grameen Telecom, HSBC, SCB, Brac, BRAC Bank, Abul Khair Group have taken different initiatives in favour of life and livelihood

16. Voluntary Activities

a) Bidyanondo Annex: 16 (a)

Bidyanondo, SAAF team up to support 22,000 families

b) Ambulance driver as samples collector

Annex: 16(b)

The ambulance driver of Jessore's Chougachha Upazila Health Complex has been helping to collect samples for testing.

17. Medicine

a) Potential Covid-19 Drug

Annex: 17 (a)

Potential Covid-19 Drug: 6 local pharmas set to produce remdesivir

Beximco, Eskayef (SK-F), Incepta, Beacon, Healthcare and Square got the permission to produce Remdesivir, a drug developed by American biopharmaceutical company Gilead Sciences.

b) Penalty Annex: 17 (b)

A mobile court of district administration fined a medicine store Tk 40,000 for selling government saline, which is not for sale, in Cumilla on Saturday night.

c) Market Management

Annex: 17 (c)

DGDA chief Maj Gen Mahbubur Rahman told, 'The planning also helped avoid a crisis of medicine as well as any hike in the drug prices during the Covid-19 outbreak'.

d) Experts on New Drug

Annex: 17(d)

Pharmacologists and virologists have spoken against 'unnecessary enthusiasm' about remdesivir and hydroxychloroquine, two drugs now under examination for COVID-19 treatment in the USA, as several companies in Bangladesh are set to produce the medicines.

18. What we need to do

a) Politicians' roles

Annex: 18(a)

Only welfare-oriented politics can lead a country and a nation towards the goal. We have many examples of pro-people politics. Politicians must be on the side of the masses.

b) Mass gathering

Annex: 18(b)

To control mass gathering during pandemic

If we are remaining far too much relaxed for our own good and instead of mass gathering if we do not achieve mass awareness in time or remain as ignorant in dealing with the predicament, the outcome might just be beyond salvation.

c) Human Rights Annex: 18 (c)

While countries around the world work to contain and limit the spread of COVID-19, certain human rights and allowable derogations become relevant. While freedom of movement is of foremost importance in discussions about the lockdowns and quarantine measures, other human-rights concerns also arise.

d) Inclusive move Annex: 18 (d)

Professor Sheikh Hafizur Rahman Karzon said, 'I am inspired by the active role and activities of Prime Minister Sheikh Hasina. Hopefully, in a few months, Bangladesh will reach at normal state. But when I get to know about mismanagement and lack of coordination through reports in print and electronic media, I became frustrated again'.

e) <u>Faith actors</u> Annex: 18 (e)

How faith actors can help fight Covid-19 crisis

The research identifies productive interactions between the faith world and the development sector and lays important stepping stones to recognising the expansive roles of religious organisations in Bangladeshi society. Such work now takes on renewed urgency and greater significance, as the existing and emerging dimensions of this pandemic reveal the importance of including faith actors in charting the course through this turbulent time and reaching safe harbour in the post-Covid-19 world.

f) Overcoming inequality

Annex: 18 (f)

Overcoming rising inequality exposed by COVID-19

Together, we have to make a stronger commitment to building a more humane, just and equitable society. For that to happen we need strong political will, bold policy decisions, accountable transparent systems of service delivery and collaboration of all sections of society.

g) Fundamental rights

Annex: 18 (g)

As the custodian of the constitution, the Supreme Court may consider taking immediate measures to ensure people can seek its protection without any hindrance and (in the interim, until such a system is put in place) advise the executive branch to strictly uphold fundamental rights of the people guaranteed by the constitution and act in accordance with the law, and only in accordance with the law.

h) Comprehensive Plan

Annex: 18 (h)

COVID-19 crisis testifies how ill prepared we have been to tackle a health crisis. Limitations are evident in many areas—from facilities such as testing kits, ventilators, hospital beds, and intensive care unit in hospitals to number of doctors and health workers. This surely indicates the need for higher investment in the health sector.

i) Herd immunity

Annex: 18 (i- i &ii))

i) In the current situation, besides prevention of infection, a few more issues need to be considered. Increase the number of tests and ensure treatment. Antibody tests can be started if necessary.

ii) Heartbreaks; hope for herd immunity

"Herd immunity" is the ultimate answer to any pandemic, and Bangladesh, by no choice of its own, is rushing towards it to keep coronavirus at bay.

Though no scientific research is done, a number of natural factors is likely to be working in our favour. We're quite immune to six other strains of coronavirus that cause seasonal flu. Factors of heat, our strange immune system developed surviving against plethora of microorganisms and pollutions over decades, comparatively low death number (269 with coronavirus and a few hundred others with symptoms) and the gene that drives us to fight against adversities all the time hold out hopes for herd immunity.

j) Geospatial mapping

Annex: 18(j)

Geospatial mapping has become a crucial tool for a data based verification of such claims or projections, and a comparative understanding of the impact of the virus. Geospatial information and analysis confirm that a collaborative way of research among policymakers, doctors, public health researchers, data scientists, geospatial researchers and other experts is very much needed in tackling the unprecedented crisis we are in today.

k) How to get rid of coronavirus

Annex: 18(k)

We have to follow the hygienic economic activities, and we also have to take the necessary precautions to prevent the spread of Corona disease. With the right combination of these two, our economic losses will be less and the epidemic will not be as strong

1) Budget thinking during Corona crisis

Annex: 18(1)

It is possible to overcome this crisis through mutual cooperation; adoption and implementation of innovative programs more than any other time. The issue of gradual opening up of the economy (exit policy) needs to be implemented in a coordinated manner with the opinion of health experts. The experience of the surrounding countries should also be kept in mind.

m) National Action Plan

Annex 18(m)

The National Action Plan would require substantial additional funding. The question is: where will such funding come from? It is obvious that internal resources mobilisation will be lower because of the considerable slowdown in economic activity and declines in export earnings and remittances. What, then, would be needed is to downsize and delay less relevant projects, revisit existing projects and cut costs wherever feasible, resort to deficit financing to the extent needed, and seek project funding from development partners and financing from international lending agencies.

n) Challenges during crisis

Annex: 18 (n)

Mr. Sudipto Mukerjee is the Resident Representative of the United Nations Development Programme in Bangladesh stated, 'This pandemic is telling us to entirely rethink development. This will require unlearning many of the old ways and adopting brand new approaches that make humankind more equal, inclusive and responsible towards each other and the planet. This will also help us seize opportunities for accelerated national development, consequently becoming better at managing these unprecedented shocks.'

o) <u>SDGs</u> Annex: 18 (o)

Sustainable Development Goals: What to salvage from Covid-19

The year 2020 was supposed to kick-off the Decade of Action. With just 10 years to go, plans were made to undertake "ambitious global efforts" to deliver the 2030 promise—by mobilising more governments, civil society, businesses, and calling on all people to make the Global Goals their own. In a sense, the process of recovery might strengthen our SDG efforts if the government of Bangladesh, in collaboration with civil society, NGOs, and the private sector, look afresh at the 17 goals and focuses its attention and resources on those that need reinforcement.

p) How to overcome limitations

Annex: 18 (p)

The social consciousness has to be strengthened to bring fundamental change in the philosophy of development during corona crisis. People's lives, democratic rights and security should be considered as the main conditions for development, not just GDP growth and blind profiteering.

q) Medical research Annex: 18(q)

The role of various universities and pharmaceutical companies in medical research is major. Scientific research requires huge amount of money. The government spends a lot of money in unproductive sectors. It makes life a little more comfortable, but the nation does not move forward.

r) <u>Universal Health Care</u>

Annex: 18(r)

Prime Minister Sheikh Hasina has the political capital to go for a big push on UHC. Given global trends, it is inevitable that Bangladesh will make the transition to publicly financed UHC at some point in the next 20 years. It will be an essential step in living with the ongoing threat of Covid-19 and achieving the long-term sustainable development goal target of universal health coverage.

s) Status of COVID Treatment

Annex: 18(s)

WHEN treatment for COVID-19 will be available? When will we get vaccines? It has almost been five months. Why is it taking so much time? What are you are doing? These are the questions I was often asked by my community people. There are so many questions in everyone's mind. Unfortunately, we do not have many easy answers. So I thought I would try to explain why this is not so easy.

t) Hospital readiness

Annex: 18 (t)

Predicting the number of cases and deaths from any disease requires some basic information, eg, (i) exposure potential— the probability of people to be exposed to the pathogen; (ii) the infectiousness of the pathogen (transmission capacity of the pathogen from host to host); (iii) the infectivity or capacity of the pathogen to cause the disease; (iv) the susceptibility of the host to infectivity or capability to resist infectivity. In the absence of these information, no model will be able to predict the incidence or outcome of an infection.

u) Blessings of Coronavirus

Annex: 18(u)

Civil rights are being restricted in countries; Laws are being made that are taking away people's right to speak. Authoritarian rulers are imposing strict controls. Government surveillance of citizens has increased; But when the citizens monitor the government, the sword comes down whenever the ruling party wants accountability. Coronavirus has really appeared to be a blessing for some.

v) Rethinking about hospital management

Annex: 18(v)

Experience in COVID pandemic, more commercial healthcare system in a country (e.g. United States, United Kingdom, Italy), has incurred more loss of life and finance. On the other hand, the more people-friendly healthcare system (such as New Zealand, Vietnam, Bhutan, Nepal, Sri Lanka), has incurred less loss of life and finance. So we have to choose one of the two paths.

w) Life and Livelihood

Annex: 18

(w)

Bangladesh has seen excellent economic growth in the last two decades. The World Bank and the IMF estimate that this growth rate will come down to 2-3 percent this year. On the one hand, exports have stopped, many orders in the garment sector are being canceled, expatriate income is also being severely damaged. On the other hand, the price of oil in the world market is falling, which will result in a decrease in the demand for labor in oil producing countries. A large number of workers can lose their jobs.

19. Women

a) Violence Against Women

Annex: 19 (a)

Some 4,249 women faced different forms of domestic violence in April this year during the shutdown enforced to contain coronavirus spreading in the country, says a telesurvey report of Manusher Jonno Foundation.

b) Socio-legal analysis

Annex: 19 (b)

It is also extremely important that governments around the world, particularly the Government of Bangladesh along with the NGOs working in this sector do not lose sight of such human rights violations. The wellbeing of the citizens must be kept in mind as they try to combat the pandemic and decide how and where to allocate resources.

20. Health Infrastructure

a) Ventilators Annex: 20 (a)

Faridpur Medical College Hospital has received two portable ventilators with support from Jalil-Ambia Support Center and Navana Group.

b) PCR Lab Annex: 20(b)

An RT PCR laboratory has been inaugurated at Jamalpur for easy and quick corona detection

21. Garments Industry

a) Status of infection

Annex: 21(a)

According to a report of Bangladesh Garment Shramik Sanghati (BGSS, 'Some 96 garment workers of a factory were found Covid-19 positive., 52 percent have been infected since the resumption of factories on April 26, and the rest 48 percent between 9-26 April.

b) Infections creep up in RMG belts

Annex: 21(b)

With more and more garment factories reopening every day, the deadly coronavirus appears to be spreading among workers in the industrial belts in Ashulia, Gazipur, Narayanganj and Chattogram. As of yesterday, at least 58 workers from 35 garment factories got infected with the virus, said the industrial police.

c) Health Services

Annex: 21(c)

Common Health to provide free telemedicine service to RMG workers

Bangladesh Garment Manufacturers and Exporters Association and Common Health Bangladesh has signed an agreement with Common Health to provide free telemedicine service to one lakh garment workers

22. International organisation

a) Asian Development Bank

Annex: 22(a)

The Asian Development Bank (ADB) 0n 7 May 2020 approved an additional \$500 million loan to strengthen Bangladesh government's efforts to manage the impact of coronavirus pandemic on the country's economy and public health.

b) European Union

Annex: 22(b)

The European Union has allocated 334 million Euros and promised mobilising more funds in near future to mitigate the economic and social impacts of the Covid-19 pandemic.

23. Right Information

a) Need of more analysis

Annex: 23 (a)

There is not enough information and analysis to understand the Corona situation in the country. Fragmented information is being given from the Department of Health. all required information for policy making and program planning is not available. Public health experts and economists say the situation needs to end quickly.

b) Authentic information

Annex: 23 (b)

To address the necessity and accessibility of verified information on COVID-19, four friends living in four different parts of Dhaka developed and launched 'Corona in Bangladesh', an online platform featuring a compilation of local and international from reliable resources, on March 21.

c) Lack of information

Annex: 23(c)

Experts are making predictions on outbreak based on assumptions. Scientists and public health experts are still in the dark, because the R-naught, which is a representation of the number of new infections estimated to result from a single case, has not been measured in the country yet. So, it is difficult to tell at what stage the outbreak is now and when it may peak and how lethal it might get, they said.

d) Missing data

Annex: 23 (c)

To design an evidence-based, feasible and effective response, the true extent of the spread and impact needs to be known, which can only be done through accumulation of accurate and up-to-date statistics. Such data is needed not only on the health sector but also on economics, businesses, education, remittance, social safety nets, etc. A constant flow of new and updated data on the response from different actors including in government, NGOs, healthcare, industry and agriculture are needed to monitor and effectively combat the disease.

24. Pregnant Women

Annex : 24

A large number of pregnant women also said that they were discharged early from hospitals to limit the risk of inadvertent exposure and infection, while the hospitals' staffers and the obstetrics teams have been trying to minimise the number of people who enter the hospital.

25. Waste Management

Protection of workers Annex: 25 (a, b,c,d)

Study finds 14,500 tonnes of waste in masks, gloves, bags generated in first month of shutdown. Environment and Social Development Organisation (ESDO) conducted the study titled "Covid-19 Pandemic Pushes the Single Use Plastic Waste UP: No Management, No Protection: Pose High Health and Environmental Risks". Protection of cleaners is one of the major concerns here. protective gear, putting themselves at grave risk of contracting coronavirus and other diseases.

26. Armed Forces Annex: 26

The ISPR said 345 serving and retired members of the Armed Forces and their family members have been admitted to the Combined Military Hospital in Dhaka after getting infected with Covid-19.Of them, 88 have returned home so far after recovering from Covid-19. All other patients are in good condition, it added.

27. Chattrogram

a) Dangers in Chattrogram

Annex: 27 (a)

After Dhaka and Narayanganj, Chittagong is now the most dangerous area for coronavirus infection. Corona virus is spreading rapidly in Chattrogram due to uncontrolled traffic and the Dhaka-Chittagong highway being almost open. Experts have expressed concern for this.

b) Testing Facilities Annex: 27(b)

Health experts at BITID(Bangladesh Institute of Tropical and Infectious Diseases) said there may be some weaknesses in the testing process at CVASU (Chattogram Veterinary and Animal Sciences University), since most of their lab technicians are not experts and there has been a previous case of mistake there as well. CVASU, on the other hand, claimed that the percentage

of positive cases were much higher as many samples were taken from Covid-19 positive patients for the second time and they who were undergoing treatment at hospitals.

c) <u>Infection Status</u> Annex: 27 (c)

Chattogram has become a hotspot for COVID-19, ranking third after Dhaka and Narayangani as 95 cases were confirmed in a single day. Experts blamed uncontrolled movement of citizens and unrestrained plying of vehicles on roads and highways for the spread of the virus.

d) Infection status of police

Annex: 27 (d)
The single-day highest number of coronavirus infections in the country's police force was recorded on 16 May as 241 cops tested positive for the virus in the 24 hours until the noon on the day.

28. Violating Safety Directives

Annex: 28

Police on 12 May shut down the Bangabazar market and two fashion outlets in the capital for flouting health safety directives to prevent transmission of coronavirus.

29. Virus genome

a) Lagging behind **Annex: 29(a)**

Mustak Ibn Ayub, Assistant Professor, Department of Genetic Engineering and Biotechnology Dhaka University said, 'We do not know how long the virus will stay in our country. We know that the virus behaved differently in different countries, To understand the nature of the virus, we need genome sequencing.

b) Crack virus genome

Annex: 29 (b)

Bangladeshi scientists crack virus genome

A team from Child Health Research Foundation (CHRF) on 13 May successfully completed the genome sequencing of the SARS-CoV-2 virus in Bangladesh. Doing genome sequencing of the virus means that scientists can begin to understand which type it is, which country it came from, and when it came to Bangladesh.

c) DU researchers achievement

A group of teachers from Dhaka University's (DU) biological science faculty have started conducting research to sequence genomes from 100 coronavirus samples taken from patients from across the country.

d) <u>Chattogram Status</u> Annex: 28(d) Researchers have found five points of mutation in the genome structure of novel coronavirus (SARS-Cov-2) in Chattogram. They came up with the findings after sequencing the virus's genome from patient samples collected from Chattogram city and different upazilas.

e) BJRI, CVASU sequence coronavirus genome

Annex: 28 (e)

Bangladesh Jute Research Institute and Chittagong Veterinary and Animal Sciences University have jointly sequenced the complete genome of a SARS-CoV-2 sample from Bangladesh.

30. Plasma therapy

Plasma Therapy Trial

Annex: 30 (i+ii)

Plasma Therapy Trial: Two doctors donate blood at DMCH

Two physicians, who are Covid-19 survivors, donated plasma at Dhaka Medical College Hospital yesterday for the trial of Convalescent Plasma Therapy (CPT) aimed at treating coronavirus patients.

31. Anti Coronavirus Fabrics

Annex: 31

Zaber & Zubair Fabrics Limited (Z&Z), a sister concern of local garment exporter Noman Group, formally launched what it said anti-coronavirus fabrics in Dhaka on 14 May. The company also obtained the US FDA Compliance certification for all types of fabrics and protective clothing for the American markets,

32. Success Story

a) Containment successful

Annex: 32(a)

Although Dhaka has by far the highest number of coronavirus cases in the country, two neighbourhoods at the heart of the city have managed to crush the Covid-19 curve. Tolarbag in Mirpur and a Buet teachers' quarter were among the first few neighbourhoods in the capital with positive cases.

b) Corona Free Area

Annex: 32

(b)

Upazila Nirbahi Officer (UNO) Oliuzzaman said, 'Covid-19 patients have been kept in isolation to ensure their health, treatment and food supply'. Samples of 6 people who came in contact with them were collected and sent to the lab for testing And their home quarantine has been confirmed. By implementing all these processes, all the patients of the upazila have become corona free.

c) Reasons behind corona free Rajshahi

Annex: 32

With the onset of coronavirus outbreak, the Rajshahi district administration, like all other cities, has given top priority to security issues. For this, various roles were taken in coordination with the city corporation.

33. Youth Engagement

Annex: 33

Interactive Cares is a youth-based organisation founded as a cloud and artificial intelligence (AI) based platform. Given the prolonged shutdown, Interactive Cares took a step to design and launch a full-fledged Model United Nations, namely, IOMUN'20, an opportunity for the youth to be a part of a noble cause. IOMUN'20 is the platform to shed light on the COVID-19 crisis. We aim to engage delegates all over the world in this fruitful conference.

34. Rohingya camp

a) Status of infection

Annex: 33(a)

3 more infected with Covid-19 at Rohingya camp

Three more Rohingyas tested positive for Covid-19 at Ukhia refugee camp yesterday, a day after the first novel coronavirus case was reported in the camp.

b) Isolation centres

Annex: 33(b)

Covid-19 Patients: Two isolation centres opened in Cox's Bazar

Two isolation and treatment centers for Covid-19 patients were inaugurated in Cox's Bazar – one at Kutupalong Rohingya camp and the other at Ukhiya upazila.

c) Strict surveillance

Annex: 34 (c)

A total of 1,275 Rohingya families in the F block of Umbia's Lambasia Shelter in Cox's Bazar were brought under severe lockdown on 15 May. About 5,000 Rohingyas from these families have been placed under 14-day home quarantine.

35. Survivor's story

Annex: 35 (a+b+c+d)

Stories are A survivor returns to the frontline, Winner Two doctors waiting to return to work, Mitford Hospital: Corona winner 29 doctors and 49 workers are going to join in work, Don't be afraid and you have to have courage in your mind.

36.Amnesty International

Annex: 36

Amnesty International has expressed concerns about media reports that say hospitals in Bangladesh are not admitting people exhibiting Covid-19 symptoms. The organisation's own investigations also found hospitals refusing to admit people with the symptoms, despite having the capacity to diagnose and treat them.

37.New Health Services Facilities

Annex : 37

Health Minister Zahid Maleque 17 May inaugurated a 2,000-bed hospital at the International Convention City Bashundhara (ICCB) in the capital for treating Covid-19 patients.

38.High Court Directives

Annex: 38 (a+b)

The High Court on 18 May directed the authorities concerned to ensure supply of personal protective equipment, including masks and gloves, to doctors, nurses, and staffers of all private hospitals and clinics across the country so that they can attend to the Covid-19 patients. A writ petition has been filed in the High Court seeking directions to take necessary measures to protect the health of 69,000 prisoners in different jails of the country in the coronavirus situation.

39.Corruption

Annex: 39

The High Court on 19 May denied bail to two contractors accused in a corruption case involving Tk 10 crore in supplying machines and equipment to Faridpur Medical College Hospital (FMCH).

40. Telemedicine Annex: 40 (a+b)

Bangabandhu Sheikh Mujib Medical University (BSMMU) and the A2I project of the Department of Information and Communication Technology have launched specialized telehealth centers to provide specialist medical services over the telephone. State Minister for ICT Junaid Ahmed Palak inaugurated the online tele-health center. A team of doctors under the banner of "Patuakhalibasir Daktar" (Doctors for the People of Patuakhali) are providing telemedicine services to the people of the district, facilitating treatment for general patients during the adverse situation amid the Covid-19 pandemic.

41. Govt. Actions Annex: 41 (a+b)

The government has removed Mugda Medical College Hospital director Shahid Md Sadiqul Islam making him an OSD. And duty-exemptions have been given on the import of personal protective equipment

42. Social Stigma Annex: 42 (a)

How to face fear and stigma

Fear and stigma are also preventing people from seeking help when they begin to show symptoms.

Here are stories related to social stigma

Annex: 42 (b,c,d,e,f,g,h,i,j)

a) Relatives leave body at Nawapara crematory fearing COVID-19, b) Stigmatisation sets in with humiliation, c) Dead body of a boy was in bed for 18 hours, d) Husband did not receive body of his dead wife, e) Family did not receive body of housewife, the police buried it, f) Teacher who is a victim of social harassment due to corona, g) Colleagues are not positive, so the nurse did not receive the service, h) A nurse screamed on Facebook and i) She died in the ambulance after 9 hours of treatment

According to webinar of Bangladesh Health Watch on 2 may 2020, two teachers cum researchers have suggested that the panic and confusion surrounding coronavirus should be removed on an urgent basis. There has been widespread panic around Corona, with rumours happening. Instead of dealing with panic and slander, it will be difficult to deal with the Corona epidemic only with medical and economic incentives.

43. Hygiene facilities disappeared

Annex: 43

Most of the hand washing basins set up in Dhaka's public spaces after the coronavirus outbreak went missing for the lack of maintenance. A number of city ward councillors said that the hand washing facilities set up at different intersections, kitchen markets, bus stoppage and terminals went missing for the lack of taking care.

44.Religion Annex: 44 (a+b)

a) Mosques

Mosques reopen for all amid more infection fear

Prayers in congregation at mosques across Bangladesh will resume from 7 May amid the increasing number of coronavirus infections in the country.

b) Shari'a rules

Discussions and reviews have started on the provisions of Islamic Sharia regarding coronavirus. Riyadh Sharia Magistrate and prominent law researcher. Khalid bin Ali Al-Mushayyaka has highlighted some important provisions of Islamic law regarding corona.

45.Rumour Annex: 45

79 held for spreading 'rumour' over COVID-19 since March

The law enforcement agencies arrested 79 people since March for spreading rumour and disinformation on social media, the Centre for Genocide Studies.

46.Local Government

Annex:46

Suspension

The Ministry of Local Government, Rural Development and Co-operatives has suspended 42 public representatives (17 UP chairmen, 23 UP members, a district council member, and a municipal councillor) for irregularities in distribution of relief among the poor amidst the coronavirus pandemic. At least 650 (36.40 per cent drop than last week) were detained or fined or penalised and 32 were arrested all over Bangladesh from April 26 April-May 2. A total of 48 (17 traders, 19 politicians, and 12 aides) were detained or arrested or fined of penalised for relief rice embezzlement.

47.Research lab Annex: 47

A COVID-19 research laboratory was inaugurated at the Centre for Advanced Research in Sciences of Dhaka University.

48.Emergency contacts

Annex:48

Emergency contacts related to services of COVID 19 are amiable here

49.Eminentcitizens Annex: 49

Thirteen eminent citizens and politicians on 9 May 2020 demanded that the government should issue food cards for all families for ensuring food security during the ongoing coronavirus outbreak across Bangladesh.

50.Fund Allocation Annex:51

The Local Government and Rural Development Ministry allocated a special fund of Tk 30.63 crore to the local government bodies to continue programmes for mitigating COVID-19 outbreak and preventing citizens from dengue.

51. Budget

a) Scarcity of Fund Annex:52(a)

Due to the low budget of the sector, lack of services and facilities, inefficiency and manpower crisis, the country is struggling to cope with the new coronavirus..

b) Health Budget Annex: 52 (b)

Although Budget allocation to the health sector has increased in 10 years but allocation for the development of health services including research is very low.

52. Vaccination Annex: 53

Many parents are concerned about vaccinating their children during the coronavirus epidemic. On the one hand, they are not able to go out with the child for fear of infection, on the other hand, the time for vaccination is also passing. But the risk for children of pneumonia, polio, tuberculosis, diphtheria, tetanus, measles, rubella is no less than that of coronary infections.

53.Govt.Directives Annex: 54

The Ministry of Health and Family Welfare has issued 13 important instructions for Govt. officials to take more precautionary measures to prevent the spread of coronavirus across the country.

54.Health Tips Annex: 55

Department of Health recommends regular lung exercise at present for increasing individual immunity

55. Quarantine Annex: 56

Fear of corona infection due to mismanagement of institutional quarantine in Nilphamari. Because 138 returnees have been placed in institutional quarantine

56. Human Rights Commission

Annex: 57

The Human Rights Commission will file a writ petition against the violation of people's right to medical treatment

57.City Corporation

Annex: 58

Annex: 59

Dhaka's two city corporations cannot afford to oversee health regulations due to shortage of manpower

58.NewRecruitment

The government has appointed 5,054 nurses for medical services in different COVID Hospitals on 8 May 2020.

59.Training Annex: 60

A free online training program on Covid-19 for doctors of Bangladesh was launched on 7 May 2020. The program is being implemented by the Center for Communication Program at Johns Hopkins University in the United States, and Access to Information (A2I).

60.Restrictions on Information Dissemination

Annex: 61

The Bangabandhu Sheikh Mujib Medical University authority has requested all concerned including teachers and doctors not to talk about any issue related to healthcare in the media without permission and not to give status through social media.

61.Legal Notice Annex: 62

A legal notice has been issued against four people, including the secretary of the health ministry, for contempt of court for making safety equipment to protect against coronavirus and failing to deliver it to hospital doctors, nurses and others.

62. Services for the People

Annex: 63 (a+b+c)

Different Members of Parliament have been doing activities for helping distress people in their locality. Side by side, field level admin officials have been running different support programmes. Bangladesh Army run 'one Minute Market' for providing vegetables to unemployed people in Chattrogram.

> Other Health Issues

A. Dengue

a) Mosquito Menace

Annex: A(a)

An entomological survey team supporting Sylhet City Corporation's (SCC) antimosquito drive found Aedes larvae at five locations of two wards in the city, as the drive resumed after being disrupted by the coronavirus pandemic.

b) Dengue panic Annex: A (b)

Anti Mosquito activities in Khulna has come to a standstill due to corona panic. Due to this mosquito infestation has increased in the city. The city dwellers are restless with the pain of mosquitoes. Now they are fearing to get dengue fever with Corona.

c) Dengue testing Annex: A(c)

In addition to the corona test, the Directorate of Health has instructed suspected patients to test for dengue. The directive was given in a video conference with the Department of Health, Civil Surgeons of 64 districts and Upazila Health and Family Planning Officers on 9 May.

B. Kidney Dialysis

Annex: B

SBMCH gets first kidney dialysis unit

A kidney dialysis unit with 10 machines has been installed at Sher-e-Bangla Medical College Hospital (SBMCH) in Barishal.

C. Diarrhoea Annex: C(a+b)

a) Mirzaganj Upazila

In the last one week, 80 diarrhoea patients were treated at Mirzaganj Upazila Health Complex.

b) Betagi Upazila Health Complex

According to the Betagi Upazila Health Complex, a total of 155 diarrhoea patients have been admitted to the health complex from April 21 to May 2. 125 people returned home with treatment. At present 30 people are admitted. Every day 15-20 patients are coming to the hospital with diarrhoea. Most of them are women and children..

2. Publication Overview

Each newspaper has been publishing mainly two types reports, these are reports on day updates and detail report. But majority published reports were daily update based. Detail reports only as a compilation of experts opinions. Trust of detail information was raised in the form of need of more information, problems related to lack of information and demand for authentic information. Prothom Alo online version runs a live update on corona. Another report published on 30 May on where to get corona treatment. A series on 'Life during corona'- a section for readers write up was available

- Daktar Achen (There is a doctor)- a periodical publication on health issues of Kalerkantho, which has covered Liver disease, infection at work place, hand washing tips Child Health during Corona, How to increase immunity, Questions and Answers on Corona and medicine; and Health tips.
- Health (a periodical publication of Daily Star on Health issues) has published Key to controlling the spread of COVID-19, Treating cancer during COVID-19, Billions worldwide living with herpes, COVID-19 dilemma: lives or livelihood, Rationing ventilators during the COVID-19 epidemic and COPD and smoking associated with higher COVID-19 mortality.
- New Age has been publishing all emergency contacts related to corona virus every day.
- News on sample collection's booth specially installed by BRAC has got repeated attention.

- Each newspaper is regularly publishing information on status of infections, i.e. number of infected person with their social and professional identity and death due to infection in different parts of the country from small village to capital city.
- During this month, newspaper published reports on life after reopening where violations of health safety codes of conducts were visible. They also projected dangers related to those violations with photos. Similarly, newspapers have been publishing different articles on policy and social guidelines to make people safe and active economy. Reports are also available on social stigma and consequences of those stigmas.
- Reopening: Different reports and articles were available on Reopening, these are Daily Star has publishes on Govt. health expert panel on Reopening risks, Prime Minister on reopening, Withdrawal of lockdown: how we should plan, DGHS Health Safety guidelines on reopening: Samakal has published on Lockdown 'exit plan' and New Business Platform; New Age has published on: Health Minister's prediction on Reopening of shops may increase COVID-19 cases and No health monitoring at markets; Prothom Alo start of normal life in the country may be delayed Transport Service after reopening and Bangla tribune Chances of infection increase after relaxation.
- During this period we found success stories. These are: Proper containment of Tolerbag and BUET Teachers Staff Quarter, Corona Free Putia and Rajshahi.
- A study report was published on death of COVID symptoms, legal actions against spread of rumours and suspension of local government representatives for misappropriation of relief and financial aid for the distress people.
- Media houses also placed a list of demand for stimulate package and provision of loan for newspapers to government for overcoming present crisis situation. Side by side, they also demanded to settle their arrear bills of government advertisements. Issues related to freedom of media raised by seven foreign diplomats working in Bangladesh. Foreign Minister termed that concern as out of diplomatic norms.
- A question mark was raised on free flow of required information which is helpful to understand dynamics of problems. This is necessary for media professionals, researchers and policymakers also.
- In this month, we found a list of activities for supporting distress people in different parts of the country by their member of parliaments. Newspapers have made available information on different humanitarian activities of local

administration and armed forces. Local administrative officials also infected during performing their field level duties.

• Where *Prothom Alo* didn't find MPs involvement in this pandemic but *Samakal* has published a compilation on their involvement.

Newspapers have published different study reports, these are as follows:

Samakal

Deaths without treatment

64.78% of the deaths at home did not receive treatment, 12.62 % died on return from the hospital, 1.27 % were not treated due to corona panic, 3.90 % died on the road.

Status of infection of Media Professionals

Another journalist died due to Corona. According to the Facebook page 'Our Media', which has been regularly publishing information about journalists being infected, 49 journalists have been infected in Dhaka and 11 outside Dhaka

Statistics on infection of field administration

107 field administration officials, including DCs, ADCs, UNOs, AC land and Executive Magistrates, have infected during performing their duties such as ensuring social distance and home, burying the dead body and distributing relief.

• Daily Star

A study report on death with Covid-19 symptom

A total of 929 people died in Bangladesh with Covid-19 symptoms between March 8 and May 12, according to a report of Centre for Genocide Studies of Dhaka University. Bangladesh Peace Observatory (BPO), a UNDP funded research facility housed at Centre for Genocide Studies. According to that study, 84 were held for 'spreading rumors' during same period

• A study report on medical waste

Study finds 14,500 tonnes of waste in masks, gloves, bags generated in first month of shutdown. Environment and Social Development Organisation (ESDO) conducted the study titled "Covid-19 Pandemic Pushes the Single Use Plastic Waste UP: No Management, No Protection: Pose High Health and Environmental Risks". Protection of cleaners is one of the major concerns here. protective gear, putting themselves

• New Age

A study report on infection of medical professionals

Bangladesh Doctors Foundation, a forum of physicians, said that a total of 475 doctors were infected with the novel coronavirus while treating COVID-19 patients at both government and private hospitals.

Writers in this month are:

Dr. Zafarullah Chowdury, Dr. Muhmamd Zafar Igbal, Dr. ABM Abdullah, Dr. Nazrul Islam, Journalist Kamal Ahmed, Journalist Mr. Soharab Hasan, , Former Caretaker Hafizuddin Ahmed, Dr. Fahmida Khatun, Dr. Atiur Rahman, Former Secretary Muhammad Faozul Kabir Khan, Professor Ali Riaz, Former Director DGHS AM Zakir Hussain, Professor of University of British Columbia Dr Muhammad Morshed, Founding Dean of BRAC School of Public Health Professor Mushtaque Chowdhury, Executive Director of Centre for Universal Health at Chatham House, UK Mr. Robert Yates, Senior Journalist Syed Abul Moksud, Professor Anu Muhammad, Senior Research Fellow, International Sustainable Development Institute (ISDI) Dr Abdullah Shibli, Resident Representative of the United Nations Development Programme in Bangladesh, Sudipto Mukerjee, Former Bangladesh Bank Governor Dr. Atiur Rahman, Journalist Abdul Quayum, geospatial experts Mohammad Arfar Razi and Sanjoy Roy, Journalist Syed Ashfaqul Haque, Executive Director at the Centre Dr Fahmida Khatun, Professior C R Abrar , Associate Professor pf Public Health and Informatics Department, Jahangirnagar University Dr. Md. 3. Summary Observations

Findings of this monitoring have helped us to draw a summary observations which is as below:

Identified key Issues presented in newspapers in May are:

- 1. Ensuring protection of professionals (health, law and enforcement agencies, field administration and media professionals)
- 2. Rejoining in work of corona warriors especially health professionals
- 3. Infection risk associated with reopening
- 4. Inhuman stories because of social stigma
- 5. Need based health budget allocation
- 6. Infections in the garments industry
- 7. Pro people politicians' roles
- 8. More testing
- 9. Human rights during corona pandemics
- 10. Inclusive move for fighting against corona virus
- 11. Engage faith actors for the betterment of people during this pandemic
- 12. Necessity of comprehensive plan for addressing better health care
- How to get rid of corona virus
- 14. National action plan for overcoming pandemic crisis
- 15. Strengthening universal health care
- 16. Ensure treatment in private and government hospital both COVID and non-COVID patients
- 17. People's oriented hospital service delivery
- 18. Need necessary actions against fear and social stigma.
